

SpacePole POSlift™

Technology Mounting Solutions

Enable height adjustment to ensure ergonomics and flexibility at the point of sale and self-service touch points

Good ergonomics is defined as fitting the task to the person, rather than the person to the task. The SpacePole POSlift's sole purpose is to do just that by allowing the height of the screen to be raised or lowered to suit the operator, whether that is a member of staff at the check-out or a customer engaging with a Self-Service touchpoint. It brings customer focus, ergonomic, productivity, and job satisfaction benefits with it.

Compatibility

The SpacePole POSlift is compatible with VESA 75 or VESA 100 screens and the entire SpacePole Essential POS mounts range as well as the SpacePole Kiosk™.

Features

- **Ergonomic workstation:** Allows for height adjustment of a screen at Point of Sale
- **Ease of use:** Allow for height adjustment at self-service touch points
- **Retrofit:** SpacePole POSlift can be retrofitted to any existing display screen installation using a VESA 75 or VESA 100 mounting system
- **Accessibility in mind:** Provide screen visibility at an optimal viewing angle

Benefits

- **Operator satisfaction:** Ensures an ergonomic workstation, which can be shared among staff at different height levels or staff members switching between a standing and sitting position throughout the day
- **Customer satisfaction:** Increase customer usage of self-service applications
- **Protect your investment:** The modularity of the SpacePole product range means that there is no need for a new pole or kiosk or replacement of any existing hardware to increase the ergonomics
- **Compliance:** Height adjustable solutions are recommended for both wheelchair users and able-bodied persons

Technical specifications

Product	SPV3309
Compatible SpacePole products	VESA 100 & VESA 75 compatible solutions SpacePole Essential range SpacePole Kiosk
