

mCase Duo™

mPOS for Zebra's TC5X series

mCase Duo - the mPOS sled that enables exceptional customer service, anywhere

This member of the mCase Duo family pairs the Zebra TC5X series Android Touch computer with a wide range of mobile payment terminals to create a pay-anywhere mPOS solution.

About

- **Effective queue busting:** Using mobile technology to take payments enables store assistants to provide customer service anywhere in-store and at a place of the customer's choosing. It immediately takes care of those queues, ensuring revenue from the customer and changes a poor customer experience into a great one
- **Maximise return on hardware investment:** Pairing the TC5X with a compatible payment terminal enables retailers to maximise their return on hardware investment, since the solution is built around hardware frequently in operation in the store, already. In this case, the cost of introducing mPOS is significantly lowered. The flexibility of mCase Duo and its ease of use makes it easy to go from scanning to mPOS and back again, in seconds, once the queues are gone
- **Ergonomically designed, easy to use:** The solution is designed with high focus on ergonomics; it's light weight with a small form factor and a wide range of accessories such as a hand strap, shoulder strap or pouch for ergonomically correct use. It is very easy to engage and release the TC5X, which makes it a perfect solution for mPOS

Applications

- In-store mPOS made simple
- Pop up and seasonal sales
- Effective queue busting

Benefits

- Easy pairing of a payment terminal to the Zebra TC5X
- Optimised weight and balance for ergonomic use
